

Senior QA Engineer (OTAs)

Ho Chi Minh city

15 March 2021

DESCRIPTION

The company provides a unique, global work environment that captures the speed, innovation and excitement of a startup, at a thriving, growing and well-established industry brand. You will be part of a dynamic, fun, and energetic team where you can immediately make meaningful contributions.

WHAT YOU WILL DO:

The QA Engineer is responsible for testing the functionality of business systems to ensure that quality standards are met. This includes business and technical functionality, taking into account the usage of the application. The QA Engineer is also responsible for validating non-functional requirements, such as system performance.

- Review functional and non-functional specifications as they are prepared by the Product Owner
- Create test cases for user stories and estimate the QA efforts for the upcoming Scrum sprint
- Setup, design, implement and maintain automation tests and continuous integration build jobs
- Plan, prepare and execute manual and automated test cases
- Analyse test results including troubleshooting and problem determination
- Provide test reports for major releases

WHAT WE NEED FROM YOU:

- +5 years' experience in Software Testing with at least +3 years' automation testing experience
- Hands-on experience in designing, implementing and executing test automation with Selenium, Postman...

- Hands-on experience with test case management tools (JIRA/TestRail)
- Strong experience in testing web-based (Backend, API...) software.
- Experience in developing end-to-end tests for complex solutions for large-scale enterprise systems.
- Strong English communication skills (both verbal & written), especially in a global software development environment
- Good attitude and mindset: organized, detail-oriented, quality-oriented and automation-oriented
- Working experience in an Agile - Scrum environment
- Computer Science degree or equivalent

BIG PLUS IF YOU HAVE:

- An interest or involvement in open-source software.
- A love of travel is not required, but hey - why not?
- Some Industry experience with public cloud offerings (e.g., AWS, Azure, Google cloud platform), PHP and DevOps skill set.
- Any additional certification or training in IT, Business, Computer Science, or related areas.

WHY US?

The Experiences Team is committed to helping travelers make the most of their trips, especially the attractions and activities along the way. Our team is in need of a creative engineer who gets excited about technology and travels to help transform the company website experience, modernize our architecture and grow our well-established Experiences business. We're looking for a senior-level engineer to join our team, someone that can grok complex systems, manage a workload independently, deliver high-quality solutions and participate as part of a distributed team. You'll join a first-in-class team of engineers, designers and product managers that quickly deliver highly scalable compelling features to 400+ million monthly visitors using an array of cutting-edge technologies.
