

Senior/Medior Java Developer (OTAs)

Ho Chi Minh city

15 March 2021

DESCRIPTION

The company provides a unique, global work environment that captures the speed, innovation and excitement of a startup, at a thriving, growing and well-established industry brand. You will be part of a dynamic, fun, and energetic team where you can immediately make meaningful contributions.

WHAT YOU WILL DO:

- Design, develop, review, implement, and manage Java applications and services for the production and pre-release environments.
- Design, develop, review, implement, and manage continuous integration, build management and deployment scripts, systems, and any code as required.
- Participate in Agile software development, prototyping, and code review with international development teams to build scalable microservices-based products and APIs using Java technologies on AWS Cloud architecture.
- Fully understand the requirements of the customer or business and utilize this knowledge to develop applications that are consistent with this.
- Work with delivery teams to achieve success through development using CI/CD and DevOps practices, processes, and tooling.
- Provide robust coding practices, solid unit/component test coverage, and debugging code.

WHAT WE NEED FROM YOU:

- 5+ years of hands-on experience in designing, developing, testing and deploying applications on Java for large scale applications.
- Strong experience in Java, Spring, MySQL and Kubernetes.
- Experience in designing & developing RESTful APIs and microservices-based systems.
- Experience in Cloud computing (Amazon Web Services).
- Well versed with Agile methodologies, TDD and Test Engineering and Automation.
- Well-versed in writing structured, well-documented, maintainable, and clean code.
- Ability to work in a complex development environment and handle dependencies across multiple teams and branches.
- Strong English communication skills (both verbal & written), especially in the global software development environment.

BIG PLUS IF YOU HAVE:

- Experience in PHP development.
- A love of travel is not required, but hey - why not?
- Any additional certification or training in IT, Business, Computer Science, or related areas.

WHY US?

The Experiences Team is committed to helping travelers make the most of their trips, especially the attractions and activities along the way. Our team is in need of a creative engineer who gets excited about technology and travels to help transform the company website experience, modernize our architecture and grow our well-established Experiences business. We're looking for a senior-level engineer to join our team, someone that can grok complex systems, manage a workload independently, deliver high-quality solutions and participate as part of a distributed team. You'll join a first-in-class team of engineers, designers and product managers that quickly deliver highly scalable compelling features to 400+ million monthly visitors using an array of cutting-edge technologies.
