- Develop new user interface features on a large-scale of web application.
- Ensure the technical feasibility of UI/UX designs.
- Optimize application for maximum speed and scalability.
- Assure that all user input is validated before submitting to back-end.
- Develop web templates based on graphical web layout designs that follow the strict requirements.
- Collaborate with other team members and stakeholders.

WHAT YOU HAVE:

- Solid front-end development skills and experience in HTML5, CSS and JavaScript (modern JavaScript - ES6).
- Expertise in JavaScript libraries (ReactJS is required) and frameworks.
- Experience with REST API development and consumption
- Experience with Webpack, JavaScript toolchain.
- Experience in writing testable code, experience in JavaScript testing both at a unit and integration level, code reviews, code standard.
- Worked in a SCRUM team and understand agile principles.
- Exposure to environment developing a large-scale web application.
- Good team player, providing guidance and assistance based on your experience in front-end development.
- Good understanding of continuous integration, GIT and the gitflow branching model.

- Good basic knowledge of NodeJS.
- Strong leadership & coaching skills (both in technical & human relations).
- Good written and verbal communication skills in English.

Here at the MessageMedia team, we don't just offer you a job, we offer you your future. Here's your chance to get your hands on...

- The latest technologies for product development
- The finest IT tools to raise your potential to even greater heights
- The power to deliver truly awesome products
- Professional training and certification programs
- English training with a native English teacher
- Flexible schedules, great benefits and bonuses
- Private health care program, extended to family members
- Access to global opportunities
