Java Team Lead (ISC)

Ho Chi Minh city

12 May 2021

DESCRIPTION

We are one of Australia's growing success stories and we are continuously searching for ambitious and like minded people to join our growing and exciting tech family. We are currently looking for an experienced Senior Java Developer to join our growing team. You will join a top team of the most talented technology experts to deliver our next-generation products!

WHAT YOU WILL DO:

- You'll work with the team to help organise the team's activities, and will play an important role in mentoring and developing more junior team members, while having plenty of time to do your own development work, and will sometimes lead more complex development tasks involving multiple people.

- Your team lead will look to you as their most capable team member and will depend on you for input and advice on many areas of the team's operation.

- We work closely with a broader open source ecosystem and contributions upstream are encouraged and part of your day to day work.

WHAT WE NEED FROM YOU:

- Strong communication and teamwork skills

- 7+ years of working experience and solid Computer Science/Engineering skills, e.g. concurrency, algorithms, data structures, distributed system concepts

- Experience in supporting/working with high velocity development processes

- An ability to understand and communicate abstract ideas and problems

- Willingness to learn new technologies

- Work confidently in Java (Rust and/or Go experience would be advantageous)

- Experience with DevOps principles and technology (e.g. Jenkins, Terraform, Docker)

- Experience with Cloud environments and concepts (AWS, Google or Azure)

- Strong leadership & coaching skills (both in technical & human relations).

- Good English communication skills (both verbal & written), especially in the global software development environment.

IT'S GREAT, BUT NOT REQUIRED IF YOU HAVE:

- Experience in low level networking, protocol design, high performance network programming

- Experience in working with or managing Redis, Cassandra, Postgres, Elasticsearch or Kafka databases.

WHY US?

We are a fast-growing company with a mission to deliver reliability at scale for our customers.

We are a diverse group of people with teams located around the world. Our work environment is collaborative, flexible, and fun.

We constantly provide our teams with opportunities to excel and encourage them to push boundaries to achieve success.
Whether you are an experienced industry veteran or just beginning your career, you will love the work we do.

We provide organizations the freedom to confidently deliver applications at the highest level of scale and reliability through open source technologies.

JOIN OUR TEAM AND HELP MAKE A DIFFERENCE!
