PYCO

Senior Angular Developer

Ho Chi Minh city

06 April 2021

DESCRIPTION

Be part of a team who offers exciting opportunities where you can have a career growth in a driven, passionate, hard-working, goal-oriented, and encouraging environment. We are a fintech company used by over 50,000 businesses across Australia who develop innovative business tools of tomorrow.

WHAT YOU WILL DO:

Have a passion for the web. We constantly talk about new web technologies and am inspired by what is possible. A passion so strong that web development is the only…

- All our developers and designers are passionate about making sensational websites. In fact, all of our team would say coding is their main hobby and code their own personal/open-source projects on weekends. We constantly talk about new web technologies and am inspired by what is possible. This role is for someone wanting a career doing what they love.

- We are a passionate, dedicated engineering team looking for experienced frontend engineers that can help take our technology stack to the next level.

ABOUT YOU:

- You are a good fit for us if you love coding, have a real passion for building web applications. You would have worked with complex projects in collaboration with other team members to create user-friendly solutions that delight your users.

- You are passionate about continuously learning and experimenting with new technologies along with mentoring junior members of the team.

- You enjoy collaborating with others inside and outside of the engineering team. You are motivated, passionate, and proud of your work. You take initiative to drive projects forward. You have the ability to articulate ideas and think critically about executing them.

WHAT WE NEED FROM YOU:

- Are an excellent communicator

- Have a passion for web

- Have hands-on experience with HTML5, CSS3 and JavaScript ES6+

- Advanced experience in AngularJS

- Have the ability to articulate ideas and think critically about how to execute them

- Contribute code to several side projects or open-source projects

- Love making dynamic websites

- Programme for the fun of it

- Are motivated, passionate, and proud of your work

- Take initiative to drive projects forward

- Strong English communication skills (both verbal & written), especially in the global software development environment.

IT'S GREAT, BUT NOT REQUIRED IF YOU HAVE:

- Experience with GIT

- Experience with a PHP Framework

- Experience in ReactJS
